SECTION A- READING SKILLS 20

I. Read the passage given below. 10

1. The modern classroom has taken several steps forward in its evolution of the learning environment in the past 25 years. Many of the benefits that we have seen in this setting are due to the introduction of new technology options for students. Instead of having a single computer for a class to use or a laboratory environment for the entire school placed in one room, we can now help students learn at their table or desk with items issued to them directly. Thus, there are quite a lot of advantages of having technology in classrooms.
2. Technology helps children to stay motivated during the learning process. Most students don't like to go to school if they feel like they are wasting their time. When there is technology allowed in the classroom, then teachers have an opportunity to let children work at a pace which suits them the best without disturbing others. They can look up additional information about a subject they are learning about that day, play educational games that reinforce the lesson, or work on advanced material using a program.
3. Because many of today's technology options allow students to see how well they are doing compared to the average of all users, it gives them a chance to push harder for themselves and their education. Many of the programs that encourage learning also issue rewards or award certificates, which helps to make the lessons fun as well.
4. Technology encourages more communication between teachers and parents. When there is technology in the classroom, then there are more opportunities for parents and teachers to connect with each other. Using a blog for the classroom can help parents get to see what their children are learning each day. Apps and software options allow teachers to instantly report on a child's behaviour to let parents know in real-time what is happening throughout the day. There are

options for chat boxes, instant messaging, and other forms of communication as well.

5. Let's not forget about email here either. Since the 1990s when this technology option came into the classroom, it created more reliability in messaging between teachers and parents should there be a need to talk.
6. Technology also creates new ways to learn for today's student. There are three critical forms of intelligence that we see in children today : emotional, creative, and instructional. The traditional classroom environment, which typically encourages lecture-based lessons, focuses more on the latter option. Standardized tests and similar ranking tools do the same. When children have access to technology today, then those who excel outside of the standard learning setup can still achieve their full potential.
7. Technology allows children to embrace their curiosity in multiple ways. They can try new things without embarrassment because their tech access gives them a level of anonymity. This process allows children to work, through trial-and error if they wish, to see if a different strategy helps them to learn more effectively.
8. It even encourages students to stay engaged with their learning environment. Children get bored very easily when they feel like they already know what is being taught in their classroom. Some children will transform into mentors or leaders in this situation to help their fellow students, but there are many more who disengage because they lack stimulation. By introducing technology to the classroom, there are fewer places where repetitive learning must take place. Teachers can introduce new subjects, try new techniques, or use different projects to encourage ongoing learning, which creates more overall engagement.

Based on your understanding of the passage, answer the questions given below.

- i. Most children don't like to go to school if :
- they don't understand what is being taught in class.
 - they feel like they are wasting their time.
 - they find class too boring.
 - they can get away with it.
- ii. Supply one advantage of having a technology that allows students to see how well they are doing compared to the average of other students.

- vi. The three critical forms of intelligence that we see in children today are :
- motivational
 - creative
 - instructional
 - competitive
 - emotional
- I, II and III
 - II, III and IV
 - II, III and V
 - I, IV and V
- vii. Who is a mentor ?
- someone who gives someone help and advice related to something
 - someone who leads someone to become a better person
 - someone who helps someone in their time of need
 - someone who provides a better learning standard
- viii. Infer one reason for the following, based on information in paragraph 7.

Children can try new things with the help of technology without embarrassment.

- ix. State 1 method through which technology encourages more communication between teachers and parents.
- x. Technology helps children to see if a different strategy helps them to learn more effectively through :
- hard work and diligence.
 - trial and error method.
 - advanced software programs.
 - strategies and lessons.

II. Read the passage given below.

10

1. In addition to using libraries and visiting art museums, historic site visitation is another common form of public engagement with the humanities. According to the National Endowment for the Arts' Survey of Public Participation in the Arts (SPPA), the percentage of people making at least one such visit fell steadily from 1982 to 2012, before rising somewhat in 2017. Visits to historic sites managed by the National Park Service (NPS) were substantially higher in 2018 than 1980, despite a decline in recent years.

In 2017, 28% of American adults reported visiting a historic site in the previous year. This represented an increase of 4.4 percentage points from 2012 but a decrease of 8.9 percentage points from 1982. The bulk of the decline in visitation occurred from 2002 to 2008.

The recent increases in visitation rates were statistically significant for the 35-44- and 45-54-year-old age groups. The larger change was found among 35-to-44-year-olds, whose visitation rate increased 8.7 percentage points. Despite the increase from 2012 to 2017 for these groups, there was a net decline in historic site visitation since 1982 for Americans of virtually all ages. Only among the oldest Americans (age 75 or older) was the rate of visitation higher in 2017 than 35 years earlier.

From 1982 to 2017, the differences among age groups with respect to rates of historic site visitation decreased. For example, in 1982, the rate of visitation among 25-to-34-year-olds (the group most likely to visit a historic site in that survey) was approximately 11 percentage points higher than that of the youngest age group (18-to-24-year-olds), and more than 17 points higher than that of people ages 65-74. By 2017, however, the visitation rate of 25-to-34-year-olds had dropped to within five percentage points of the younger cohort and was virtually identical of that for the older group.

2. While visitation rates are converging among the age cohorts, the differences by level of educational attainment are still pronounced. In 2017, as in earlier years, the visitation rate among college graduates was more than twice as high as the rate among those

who finished their studies with a high school diploma (43% as compared to 17%). Among those who did not finish high school, visitation rates were below 10% throughout the 2008-2017 time period. Conversely, among Americans with a graduate or professional degree, visitation rates were in the vicinity of 50% during these years. Data from the National Park Service (NPS) indicate the types of historical sites visited most and also the demands made of these sites' physical infrastructure and staff. Visits to NPS historic sites rose from approximately 59.5 million in 1980 to almost 112 million in 2018. Throughout this time period, visits to historic sites constituted approximately a third of total NPS recreational visitation.

3. Since hitting a recent low in visits in 1995, total visits to historic sites of all types increased 58% to a high of 120.3 million in 2016, before falling 7%, to 111.9 million visits in 2018.
4. Much of the recent growth in visits to historic sites occurred among parks classified as national memorials and was driven by a particularly high level of visitation at sites that did not exist in 1995, such as the Franklin Delano Roosevelt Memorial (3.3 million visitors in 2018), the Martin Luther King, Jr. Memorial (3.6 million visitors), and the World War II Memorial (4.7 million visitors). As a result, visits to national memorials increased more than 300% from 1995 to 2016, even as the number of sites increased just 26% (from 23 to 29). In comparison, visits to national monuments increased only 3%, even as the number of sites in the category increased by 9% (from 64 to 70). From 2016 to 2018, the number of visits fell in every category, with the largest decline occurring at the memorial sites (down 10%), and the smallest drop at national monuments (3%).

Based on your understanding of the passage, answer the questions given below.

- i. Which of the following is not a common form of public engagement with the humanities.
 - (a) visiting public memorials
 - (b) visiting art museums
 - (c) using libraries
 - (d) historic site visitation

SECTION C- LITERATURE 40

V. Reference to the Context 10

I. Attempt ANY ONE of two extracts given. 5

I.A That evening, after I'd finished the rest of my homework, the note about the essay caught my eye. I began thinking about the subject while chewing the tip of my fountain pen. Anyone could ramble on and leave big spaces between the words, but the trick was to come up with convincing arguments to prove the necessity of talking. I thought and thought and suddenly I had an idea. I wrote the three pages Mr. Keesing had assigned me and was satisfied. I argued that talking is a student's trait and that I would do my best to keep it under control, but that I would never be able to cure myself of the habit since my mother talked as much as I did if not more, and that there's not much you can do about inherited traits.

(From the Diary of Anne Frank)

i. What is the main feature of an essay according to Anne?

- ii. Anne’s argument about talking was that:
 - (a) talking is a fundamental right

1.B Ausable did not fit any description of a secret agent Fowler had ever read. Following him down the musty corridor of the gloomy French hotel where Ausable had a room, Fowler felt let down. It was a small room, on the sixth and top floor, and scarcely a setting for a romantic adventure. Ausable was, for one thing, fat. Very fat. And then there was his accent. Though he spoke French and German passably, he had never altogether lost the American accent he had brought to Paris from Boston twenty years ago. “You are disappointed,” Ausable said wheezily over his shoulder.

(The Midnight Visitor)

- i. Substitute the word ‘musty’ with ONE WORD similar in meaning, in the following sentence from extract: “Following him down the musty corridor of the gloomy French hotel where Ausable had a room...”
